PRAJWAL BHATIA

Senior Frontend Engineer

India

+91 8708992511 | prajwal6bhatia@gmail.com | prajwalbhatia.com | linkedin.com/in/prajwalbhatia

Summary

Senior Frontend Engineer with **7 years of experience** building production web applications with **React**, **TypeScript**, and **JavaScript**. Strong in **frontend architecture**, **performance optimization**, **testing**, reusable component design, and cross-stack development with **Node.js**.

Experience

Senior Software Engineer (SDE-3) **04/2025 – 09/2026**
Virtual Internships *Remote, United Kingdom*

- **Re-architected Batch Selection** by decomposing a 500-line component into focused hooks, migrating Redux thunks to **RTK Query** with caching/deduplication, and shifting business rules server-side.
- Built an asynchronous thumbnail extraction service using **Node.js**, **BullMQ**, **Puppeteer**, and **GCS**; implemented an OG-tag fast path resolving **∼55% of URLs in ∼1s** with **8× lower latency** and **95% production success**.
- Owned **end-to-end workflows** across notes, recommendations, candidature, interview, and offer pipelines, delivering frontend experiences alongside **Node.js APIs**, **TypeORM**, database migrations, indexing, and background jobs.
- Owned candidate and internship workflows spanning **285K+ active applications** and **23K+ companies**, improving filtering, shortlisting, pagination, URL state, API efficiency, and duplicate-request handling.
- Evolved a **shared core frontend repository** across multiple product surfaces, building reusable components and patterns while engineering **Resume Builder** capabilities and improving **accessibility**, test coverage, and CI hygiene.
- Drove **AI-native frontend development** practices using **Claude** and co-created **CLAUDE.md** guidelines covering architecture, coding standards, testing expectations, and reusable patterns to improve consistency of AI-generated code across the team.

Software Development Engineer – 2 (Frontend) **01/2023 – 04/2025**
Virtual Internships *Remote, United Kingdom*

- Led **Core Web Vitals optimization**, reducing Batch Selection **LCP p75 from 5.45s to 3.17s (42% reduction)** via image preloading, third-party preconnects, and deferred analytics.
- Improved Intern Profile **CLS p75 from 0.229 to 0.006** by reserving layout space and introducing skeleton loaders, completely eliminating major page layout shifts.
- Led migration of core UI surfaces from EUI and Ant Design to **Material UI**, standardizing design tokens, modals, navigation, and state feedback across multiple enterprise dashboards.
- Scaled Browse Candidates workflows on a global platform serving **285K+ active applications** and **23K+ companies**, optimizing filtering, URL-driven state, pagination, and API deduplication.

Software Developer **07/2021 – 01/2023**
Extramarks Education India Pvt. Ltd. *Noida, India*

- Expanded the **Nucleus Player** from video playback into an interactive learning experience supporting HTML content, animations, games, PDFs, and in-video questions and tests.
- Delivered player features across **web and React Native** apps used by students and teachers, and introduced milestones to structure the learning experience.
- Designed and implemented **offline video downloads**, including profile-specific video listings and filtering by class, chapter, and topic.

Associate Software Engineer **08/2019 – 07/2021**
Attosol Technologies *Kolkata, India*

- Owned the **File Manager and Image Manager** modules and built documented, reusable React components for the platform.
- **Reduced API calls by 50%** through client-side caching.

Projects

Ownfolio - https://www.ownfolio.in *Personal Project, In Progress*

- Building a personal record of engineering work to help developers preserve project contributions and architectural decisions for resumes, interviews, and career reflection, even after losing access to company tools.
- **Tech stack:** Next.js 16, React 19, TanStack Query, Tailwind CSS 4, Node.js 24, Express 5, Zod, PostgreSQL 18, Drizzle ORM, Redis, BullMQ, Railway.

Technical Skills

Frontend:
JavaScript (ES6+), **TypeScript**, **React**, **Next.js**, React Native, HTML5, CSS3, React Router, **Redux Toolkit**, **RTK Query**, Material UI, Vite

Frontend Architecture & Quality:
Component Architecture, Design Systems, Accessibility, **Core Web Vitals**, Performance Optimization, **Jest**, React Testing Library

Backend & Data:
Node.js, Express, REST APIs, **TypeORM**, **Redis**, **BullMQ**, Puppeteer, GCS

Observability & Tooling:
Datadog, Sentry, Lighthouse, Git, CI/CD

Awards & Honors

Winner, Smart India Hackathon – National Level | **Finalist,** hackCBS

Education

B.Tech in Computer Science, JMIT — 2016 - 2020
