

PRAJWAL BHATIA

Senior Frontend Engineer

India

+91 8708992511 | prajwal6bhatia@gmail.com | prajwalbhatia.com | linkedin.com/in/prajwalbhatia

Summary

Senior Frontend Engineer with 7 years of experience building production web applications with React, TypeScript, and JavaScript. Strong in frontend architecture, performance, testing, reusable components, and cross-stack development with Node.js.

Experience

Senior Software Engineer (SDE-3)

Virtual Internships

04/2025 – Present

Remote, United Kingdom

- Re-architected Batch Selection by decomposing a 500-line component into focused hooks, migrating Redux thunks to RTK Query with caching/deduplication, and moving business rules server-side.
- Built an asynchronous thumbnail extraction service using Node.js, BullMQ, Puppeteer, and GCS; an OG-tag fast path resolved ~55% of URLs in ~1s with 8× lower latency than the Puppeteer fallback and 95% production success.
- Designed a reusable **react-window**-based virtualized filter adopted across 10+ autocomplete/filter surfaces, gated at 200 items to avoid unnecessary overhead.
- Owned cross-stack features across notes, recommendations, candidature, interview, offer, and internship workflows, contributing frontend flows alongside Node.js APIs, TypeORM, migrations, indexing, background jobs, and notifications.
- Evolved a shared frontend repository used across multiple product surfaces, extracting reusable components, building Resume Builder capabilities, and improving accessibility, testing, CI, and dependency/security hygiene.

Software Development Engineer – 2 (Frontend)

Virtual Internships

01/2023 – 04/2025

Remote, United Kingdom

- Led Core Web Vitals optimization, reducing Batch Selection LCP p75 from 5.45s to 3.17s (42%) through image preloading, third-party preconnects, and deferred analytics.
- Improved Intern Profile CLS p75 from 0.229 to 0.006 by reserving layout space and introducing skeleton loaders, eliminating major layout shifts during page load.
- Led migration of core UI surfaces from EUI and Ant Design to Material UI, modernizing drawers, modals, navigation, file pickers, loading states, timelines, notifications, and forms while establishing consistent theme typography.
- Developed and evolved Browse Interns/Candidates workflows on a global platform with 285K+ active applications and 23K+ companies, improving filtering, shortlisting, URL-driven state, pagination, API efficiency, responsiveness, and duplicate-request handling.

Software Developer

Extramarks Education India Pvt. Ltd.

07/2021 – 01/2023

Noida, India

- Owned a video player platform end-to-end, including playback, background downloads, session tracking, milestone instrumentation, and reusable React component refactoring.

Associate Software Engineer

Attosol Technologies

08/2019 – 07/2021

Kolkata, India

- Reduced API call volume by 50% through client-side caching, request deduplication, and TTL-based invalidation; built responsive React interfaces and REST API workflows.

Technical Skills

Frontend & Architecture:

JavaScript (ES6+), TypeScript, React, React Native, Next.js, React Router, Vite, Material UI, Redux Toolkit, RTK Query, Component Architecture, Design Systems, Accessibility

Backend, Testing & Production:

Node.js, Express, BullMQ, Redis, Puppeteer, TypeORM, Datadog, Sentry, Jest, React Testing Library, REST APIs

Education

Seth Jai Prakash Mukand Lal Institute of Engineering & Technology (JMIT)

Bachelor of Technology (B.Tech.) in Computer Science

2016 – 2020

Radaur, India

Awards & Honors

Winner, Smart India Hackathon – National Level | **Finalist**, hackCBS
